

SEQUENCE PREP

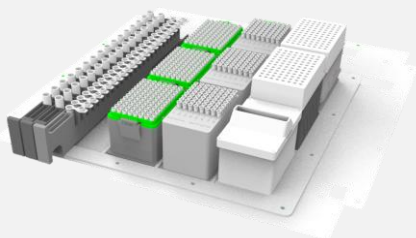

Liquid handler

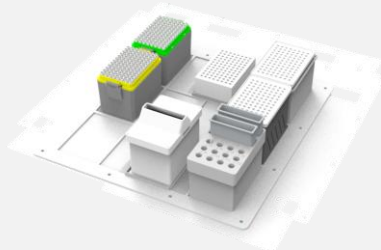

Automatize your protocol

The Sequence PREP is adaptable to a wide variety of protocols thanks to its standard modules. Fully automatize your pipetting processes to gain time and scale your operations. Contact us and get a feasibility study of your project.

Extraction + Purification

Extraction + PCR plate setup

Embedded hardware

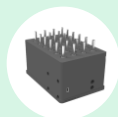

Included

On option

Wide compatibility

3-axis robotic arm

Magnetic module

1,5 to 15mL
input/output
tubes

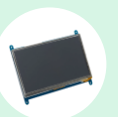

0,5-1000µL
electronic
multichannel
pipette

Automatic
barcode
scanner

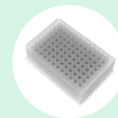

10-1000 µL tips

Touchscreen

Thermal
module

Standard
plasticware
